Graduating Class

CLASS OF 208 GRADUATES

Commencement Exercises of City Schools

of the State University, to the grammer school graduating class of 1966, at the Toler last night, was a fitting climax to Chancellor Strong has an admirable personality and as a speaker is most interesting. The high position he holds in the educational work of the state alone recommends him to an audience, but after listening to him for an hour, those who heard him last night have a greater regard and a better understanding of the man who represents the greatest educational institution in the state of Kansas. The development of the present magnifimon schools of early times to its culmination in the grand State University, was

the theme of Prof. Strong's address, "The scant education which sufficed for our fathers and mothers, grandfathers and grand-mothers, is not suffiient for the present generation and a community has no greater enemy than the man who contends that 'what was good enough for him in his childhood, is good enough for his child," said Prof.

"While the nation was in its infancy, the common schools covered those things which were necessary to the time. The life of the early settlers of New England which was the hirthplace of the commo school system, did not demand a higher education, but with the great enterprises, the wonderful growth of industry and the advancement along every line, it becomes necessary for education work to keep pace. The great institutions and In order to meet th's demand it is neces the university is not sufficient, as has been proven by the addition in several iniversities of three graduate grades.

"The greatest factor we have in pre-paration for thorough school training is he kindergarten. The common school we have long had; the high school is a consecting link with the university and the miversity is inevitable, making a grand and glorious combination of free educational institutions, unequaled in the

The large graduating class of 26 mem sers was arranged in seven tiers, rangng up from the front of the stage. soys of the class were on the north skile and the girls on the south, with the memers of the board of claration, Superintendent Knight and Chancellor Strong on either side in front. The tiers of young cople, the pretty dresses and profusion of flowers, under lights lights, made a ery fascinating scene.

LEWIS ACADEMY WON. Took Third Game of Series From High School.

The High School team went down to de feat yesterday afternoon at the hands of the team from Lewis Academy. The game was played at the corner of Eigh teenth and Waco. Both schools were well represented and the rooting was a feature of the game. The first inning was played without ofther side scoring, and it looked like a close game. The Academy opened up in the second, however, and five men had crossed the plate before the side was retired. Every inning after that brought in one or more scores for the at the end of the sixth inning on account of the rain the score stood 12 to 1 in the Academy's favor. High School's only score was made on an error in the third inning. A feature of the game was the run for a long fly by Prof. Wareham in center field. G. Merry, for the Academy, sitched a great game, allowing only four hits and one base on balls. Walton and Dayton pitched for the High School, Score by innings: High School

CATARRH GERM DISCOVERED.

Hyomei Destroys It and Cures the Disease-Money Back if It Fails. Catarrh means inflammation of the ucous membrane. It may be of the ye, ear, nose, throat, stomach or lungs, but it is generally understood as inflammation of the nasal and air passages. This is caused by a germ known as 'catarrhal micrococcus" and generates poison which is absorbed by the general system. As a result a chain of symptoms follow, warning signals that Nature needs

Catarrh cannot be cured until the germ is fligt killed. All the stomach dosing n the world can do no actual good unless the nose and throat are completely freed from catar hal microbes and the poison that they produce.

Hyomel is Nature's true cure for this disease; It destroys all catarrhal germs in the air passages and lungs; soothes and heals the irritated mucous membrane, and effectually drives from the ystem all traces of the poison. When using this treatment the air you

breathe is like that of the mountains high above sea level, where the ezone of pine woods fills the air with purifying and healing qualities that give health and strength to those suffering with discases of the respiratory organs.

Wichita druggists have sold hundreds of Hyomel outfits, and have seen such remarkable results from their use, that they make a general offer to every one to buy a Hyomel outfit with the undercan be given of their belief in the powers of Hyomel to cure cafarrhal disorders.

FLECTION EXPENSES.

Auditor Will File Report With Commissioners Monacy.

The county auditor is preparing a reout on the expenses of the special election which will be filed with the county ommissioners the first of next weak. The claims precented number 214, but the expenses will not be so great as those of last fall a election, as there were fewer votes to count. Of the 214 claims presented 200 are by clerks and judges in the forty-eight voting precincts in the county.
